SKILLS

Programming Languages: Java, Python (Intermediate), JavaScript, HTML, CSS, MySQL

Frameworks/Libraries: React, Tailwind, Django, REST APIs

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms (DSA)

CODING

ACHIEVEMENTS

Solved over **300+** problems on LeetCode.

Solved over **165+** DSA problems on GeeksforGeeks.

LANGUAGE

English , Tamil

FREELANCE PROJECTS

//tamilnadunursingadmission

EXPERIENCE

KREEVTECH - SOLUTIONS | INTERNSHIP - PROGRAM

3-month | Coimbatore

FULL-STACK DEVELOPER

- Created interactive user interfaces on multiple devices utilizing **HTML5**, **CSS3**, and **JavaScript (ES6+)**, which included agile DOM manipulation techniques, **form validation**, and **data processing** through the **Fetch API** and **JSON**.
- Developed and maintained **MySQL databases** by designing **schemas** for tables, defining **relationships**, and constructing **SQL statements** for data insertion, updating, retrieval, and deletion
- Developed **Django apps** with **models**, **views**, **templates**, and built **RESTful APIs** using Django views to perform **CRUD operations**, ensuring seamless connection between the **front end** and **back end** of the application

FREELANCE | WEB DEVELOPER

- Completed **2 freelance projects**, both **frontend and backend development** on my own.
- Designed **responsive, accessible websites** with **HTML**, **CSS**, **JavaScript**, and **React.js**.
- Implemented **backend functionality** for handling forms, user data, and **APIs**.
- Created experience in **frontend-backend integration**, **routing**, and **component-based UI creation**.
- Hosted websites on **custom domains**, learned **about hosting and handling DNS**.

PROJECT

GREEN HUB | //GREENHUB-ONEPAGE | | //GREENHUB-VIDEO-LINK |

- Developed **GreenHub**, an online marketplace that connects **farmers**, **market vendors**, and **companies** to buy and sell **agricultural goods**, **cotton**, **fruits**, and **vegetables**. Each user has a separate dashboard where they can manage their activities. They can also **post messages** and **chat** with others. All messages, posts, and notifications are shared in real-time across the platform.
- **Farmer** - Using **Razorpay**, you can **create profiles**, **list products**, **monitor real-time market prices**, **send offers**, **negotiate deals**, and get paid instantly
- **Market Shop** - **Browse** and **follow farmers**, get alerts about offers, complete orders through **live chat**, and pay securely using **Razorpay**.
- **Company** - Companies use the dashboard to reach **verified farmers**, **negotiate bulk deals via chat**, validate large orders, and safely process **bulk payments** using **Razorpay**.
